

TALHA FAROOQ AWAN

Product Designer | UX/UI Design | B2B SaaS, Enterprise & Mobile

Lahore, Pakistan (open to remote) | +92 332 1770056 | talhafawan@gmail.com

Portfolio: talha.design | LinkedIn: linkedin.com/in/talha-f-5145611b2

PROFESSIONAL SUMMARY

Product Designer with 6+ years designing B2B SaaS, enterprise and mobile products across aviation, HR tech, fintech, crypto and edtech. I own the end-to-end process, from user research and problem framing to interaction design, design systems and developer handoff, and turn complex workflows into simple products with measurable results: quoting time roughly halved, leave decisions cut from 3 days to 4 hours, write-up time cut from 30–40 to 10–12 minutes. Experienced as sole designer and product owner with PMs, engineers and analysts, including AI features with human-in-the-loop review. Seeking Senior Product Designer roles.

CORE SKILLS

Product & UX: Product Design · End-to-End UX · User-Centered Design · Design Thinking · Problem Framing · User Research · User Interviews · Observational Research · Usability Testing · Journey Mapping · Information Architecture · User Flows · Wireframing · Interaction Design · UI Design · Visual Design · Prototyping · Edge Cases & Error States

Systems & Delivery: Design Systems · Design Tokens · Component Libraries · Developer Handoff · Agile / Scrum · Cross-Functional Collaboration · Stakeholder Management · Product Ownership · Product Strategy · Success Metrics

Platforms & Domains: B2B SaaS · Enterprise Software · Web Applications · iOS · iPadOS · macOS · Dashboards · AI Product Design · Human-in-the-Loop AI · Regulated Industries & Compliance · HR Tech · Fintech · Edtech · Crypto / Web3

Tools: Figma · Adobe Illustrator · Claude & Claude Code (AI-assisted prototyping) · Code Prototyping

PROFESSIONAL EXPERIENCE

Product Designer | NGFT (Next Generation Flight Training), Switzerland · Remote

Sep 2024 – Present

B2B SaaS operations suite used by 8 operators across Europe for scheduling, training, safety and compliance. Sole designer on most projects.

- **Redesigned a high-volume quoting workflow end to end in 3 months.** User interviews showed the software was avoided during live calls; I restructured it around the task, removing duplicate data entry (2 passes to 1) and about 12 modal round-trips per job. Users report call-to-quote time roughly halved; in daily use across 8 operators.
- **Owned a training-records module as designer and product owner**, from 15 user interviews to launch with 2 engineers. Write-up time fell from 30–40 to a logged 10–12 minutes; a companion iPad app was adopted by all 6 instructors in the pilot, replacing paper entirely.
- **Designed an AI-powered compliance review** that checks company manuals against 140+ regulatory requirements, replacing a 5–6 day manual process, with every AI verdict traced to its source page. Validated prototypes with 10 users across 8 customers in 1 month; shipped the MVP in 3 months with zero new design-system components.
- **Designed an AI-assisted incident-reporting workflow (proof of concept)** with human-in-the-loop review and audit trail, from research with 12 safety managers; also digitized a paper maintenance log with real-time asset status and automatic service alerts.
- **Designed every state, not only the happy path** (16–19 per flow: empty, error, offline, conflict), and extended the shared design system with tokens and components without fragmenting it.

Product Designer | Punjab Group, Lahore

Dec 2023 – Sep 2024

Enterprise HR platform (HX Insight) for 8,700 employees across 32 companies.

- **Led the redesign of leave, resourcing, onboarding and attendance workflows**, replacing email and spreadsheets. Shipped in 6 months; in daily use since June 2024.
- **Cut leave approvals from about 3 days to 4 hours**, staffing an open role from about a week to 1 day, and raised new hires set up on day one from 4 in 10 to 9 in 10; approved data now goes straight to payroll, ending re-entry of 32 spreadsheets.
- **Aligned 32 subsidiaries on one set of rules and tested with 50 users**; kept delivery on track after a mid-project team cut by running tight sprints and working as a part-time front-end developer. Also designed companion macOS and iOS apps.
- **Designed AR-based learning modules** for schools and colleges (edtech).

UX/UI Designer | Decklaration, Lahore

Nov 2021 – Dec 2023

- **Designed an NFT marketplace for art galleries in Singapore**, including real-time bidding and digital ownership verification.
- **Designed a white-label crypto wallet** that financial institutions can brand and offer to their own customers.

UX Designer | TenX, Lahore

Sep 2020 – Oct 2021

- **Designed fintech and business intelligence products** with a multidisciplinary team; built and documented the design system and design tokens, ran user interviews and market research, and produced user flows and journey maps.
- **Previously UI Design Intern** at AlphaSquad Technologies (remote), Jan – Jun 2020.

EDUCATION

BS Software Engineering | University of Engineering and Technology (UET), Taxila

2016 – 2020
